

ABSTRACT OF THE DISCLOSURE

Platinum(II) complexes are provided selected from the group consisting of compounds of the general formulae I to IV and physiologically acceptable addition salts thereof,

5

wherein the radicals R^1 to R^4 , $R^{1'}$ to $R^{3'}$, X , X' , Y , a , i , k and n are defined as in the description,

and mixtures of the compounds for use as prophylactic and / or therapeutic agents for the treatment of diseases,

and cytostatic platinum complexes with the general formulae

wherein A , Z and n are as defined in the description.
